
SERVICE OVERVIEW

Technical due diligence.

A clear picture of your technical risks — and a concrete plan to reduce them.

01 Discovery

02 Mitigation

03 Verification

It happens to organisations of every size.

2020 · Healthcare

Patient records held for ransom

A Finnish psychotherapy provider's patient database was breached. The data was used to extort both the company and its patients, and ended up on the dark web.

2015 · Gaming

Accounts shown to strangers

During a holiday traffic spike, a caching mistake at a major game platform showed users other customers' names, emails and account details.

2019 · Public sector

Calls left on an open server

Recorded calls to Sweden's medical advice line were found on a web server with no password protection. Six organisations were investigated by the data protection authority.

— WHY IT MATTERS

Know your risks before someone else finds them.

Incidents like these can be mitigated by knowing your organisation's risks better — moving from simply knowing about issues to clear actions that reduce them.

Unknown unknowns

What you don't know you don't know

Unknown knowns

What you don't realise you know

Known unknowns

What you know you don't know

Known knowns

What you know you know — the goal

— WHAT YOU GET

A snapshot of your technical capabilities and risks.

A confidential report with detailed recommendations, an easy-to-read executive summary, and a presentation of the findings.

Detailed recommendations

- ✓ Estimated probability and impact for each finding
- ✓ Recommended actions to take
- ✓ Supporting material where it helps

Executive summary

- ✓ Written for non-technical readers
- ✓ Presented to leadership, with time for questions

Establishing a baseline.

An in-depth interview with your technical leadership, covering four areas.

01

Technical security

Infrastructure, access, code and dependencies.

02

Organisational security

Policies, roles and routines.

03

Operational capacity

Team, processes and ability to deliver.

04

Data compliance

GDPR and how data is handled.

Deliverable: a report with comments on each area, an executive summary and risk-classified recommendations — presented to the relevant audience.

Reducing the risk.

You do the heavy lifting

- ✓ Apply the suggested solutions
- ✓ Document the risks you accept
- ✓ Strengthen operational capacity

We're available for questions whenever you need more detail.

We bring in specialists

Where you need help in a specific area, we connect you with trusted partners:

- ✓ Penetration testing
- ✓ Financial advice
- ✓ GDPR training

Checking the progress.

We revisit the report and update the status of every finding.

01

Verification report

The current status of each finding.

02

Executive summary

For non-technical readers.

03

New goals

We set goals for the next period
— and the cycle starts again.

Fixed prices, no surprises.

Phase 1 · Discovery

Stakeholder interviews, report
and presentation

70 000 SEK

Phase 2 · Mitigation

You do the work — so it's free.
Extra help when you need it.

1 500 SEK/hour

Partner work quoted separately.

Phase 3 · Verification

Verification report, residual risks
and new goals

10 000 SEK

— TECHNICAL DUE DILIGENCE

Thank you.

Let's talk about where your biggest risks are.
